

## Pipe Capacity

| Diameter <br> Of Pipe | Length in Feet <br> Per Gallon |
| :---: | :---: |
| $1 / 8^{\prime \prime}$ | 338 |
| $1 / 4 "$ | 185 |
| $3 / 8^{\prime \prime}$ | 100 |
| $1 / 2^{\prime \prime}$ | 63 |
| $3 / 4^{\prime \prime}$ | 36 |
| $7 / 8^{\prime \prime}$ | 32 |
| $1 "$ | 22 |
| $1-1 / 4 "$ | 12.8 |
| $1-1 / 2^{\prime \prime}$ | 9.45 |
| $2 "$ | 5.73 |
| $2-1 / 2^{\prime \prime}$ | 4.02 |
| $3 "$ | 2.6 |
| $3-1 / 2^{\prime \prime}$ | 1.95 |
| $4 "$ | 1.57 |
| $5 "$ | 0.96 |
| $6 "$ | 0.66 |
| $8 "$ | 0.39 |
| $10^{\prime \prime}$ | 0.24 |
| $12^{\prime \prime}$ | 0.16 |
| $14 "$ | 0.12 |
| $16^{\prime \prime}$ | 0.1 |
| $18 "$ | 0.07 |

EXAMPLE: If you have a $40-\mathrm{ft}$. pipe and the diameter is 10 inches, the formula would be as follows:
$40-\mathrm{ft}$. divided by $.24=166.67$ gallons
This is the volume of the pipe, which means you would only need 84 gallons of RYDL YME Marine and 84 gallons of water.
