

# Preventing disruption at sea

France, Malta, Italy, Spain, Croatia, Montenegro, Sint Maarten, South East Asia, Florida.

## Preventing disruption at sea

Achieve a trouble-free season by preventing plumbing and sanitary infrastructure problems before they happen.

Taking steps to prevent problems from developing in the first place can help you spot one if it should occur, resulting in earlier diagnosis and less drastic treatment, giving you the opportunity to minimise disruption and costs.

## Vacuum toilet pipe de-scaling - Evac & Jets

Over time the pipework of a marine sewage system becomes progressively lined with a build up of calcium, magnesium, hard water scale and struvite deposits. The subsequent reduction in the cross sectional area of the pipe leads to reduced flow rates and eventual blockages in the system.

Marinevac's cleaning method is unobtrusive, clean and safe. The pipework is treated under vacuum so reducing any possibility of leaks and allowing the the system to be fully operational during the cleaning process.

## Grey water pipe cleaning

Our "Puracator" cleaning system has been specially designed to keep grey water pipework clean, free from blockages and infection risks.

Slow running drains can create harmful bacteria leading to potential health issues, unwanted odours and can eventually cause flooding. Our unique jetting system can easily enter all pipework with minimal disruption, leaving bathroom sinks, showers and galley drains clean and working efficiently.

## Protect your yacht against viruses

Our “PuraMyst” service is an efficient and effective way to sterilise a complete vessel, eradicating 99.99% of all airborne diseases, surface pathogens and viruses. The particle technology used ensures even area and surfaces hidden from sight are also treated – including HVAC systems. PuraMyst is safe to use on all interior hard surfaces and soft furnishings, leaving no visible trace or residue.

**puramyst**

## Clean the air you breathe

Unfortunately the air we breathe is not always as pure and fresh as we would like. This is an issue on board yachts, with many people living and working in close proximity and often in confined spaces. We have a range of chemical free purification solutions that can be incorporated into your HVAC installation to improve the cleanliness and quality of the air you breathe, reducing dust, odours, bacteria, mould, mildew, fuel, smoke and importantly airborne viruses.

## Specialised Duct Cleaning Service

HVAC systems obviously require regular maintenance in order to comply with fire prevention requirements, particularly in the galley and laundry. It is also important to ensure the air you are breathing is clean. Regular maintenance of all interior ducts will help provide a healthy environment for both living and working.

## Enhancing air quality

Capture Coating TM is an economical but highly effective additive to your HVAC filter system that widens the spectrum of particles stopped by your filter fabric.

Particularly effective against viruses.

## Custom fabrication and engineering

Using a highly experienced Marine Engineer, we can offer the following services; custom build and installation for all types of pumps, tanks, pipe-work and vacuum generation plants.

## Pump repair & servicing

The vacuum pump is the heart of a toilet system therefore it is important to keep up with a regular maintenance plan to prevent unplanned downtime and expensive emergency repairs. Booking a regular service plan will ensure your pumps are kept at optimum performance levels. Using only genuine EVAC or JETS spares, our qualified engineers can provide a fast turnaround service

# Marine Spares online shop

Our sister company "Marine Spares" offer a wide range of spare parts from many different manufacturers. Offering competitive prices and speedy delivery to our clients worldwide we aim to provide a fast, efficient service dealing with all quotation requests within 24 hours.

## Marine Spares SL - Official EVAC Distributors

By using our Marine Spares shop, orders can be placed online or you can check out technical details or prices 24/7. Of course you can contact us directly by phone or email if you prefer the more personal approach.

Once an order is confirmed we will ship using DHL Express service so most stock items can be received within just a few days.

## Anti Flood Shut-Off Valves

A simple and effective retro fit fail-safe valve that will prevent a vacuum toilet overflowing and causing flooding.

**EVAC / JETS toilets  
pneumatic push  
buttons**

## European Distributor for Rydlyme Marine Descaler

A fast acting, biodegradable raw water descaler designed for the maritime industry to safely dissolve calcium, rust, zebra mussels and other mineral deposits. Safe to use on metals, rubber and more. This will help keep engine temperatures down and reduce expensive maintenance costs.

## Halo in-air purification systems

Easily mounted into the existing air handler HVAC ducting, these units treat and sterilise the air throughout the entire vessel, reducing bacteria, viruses, mould, smoke, odours allergens, dust and particulates.

## Leading brand bathroom supplies

Hansgrohe, Duravit, Dornbracht all leading names in luxury bathroom fixtures and fittings.

# FLUSHAWAY™

**anti-bacterial wipes**  
**Coming Soon**

**Coming Soon - The World's first, truly soluble sanitising wet wipe.**

Watch it completely disappear in front of your eyes!

Safe for our oceans,  
Better for our planet.  
"Fine to Flush" certification.

Reduce cross contamination when cleaning. Dissolves in seconds in toilets or in sinks.

## Capture Coating™

Improve your AC filtration against virus and airborne threats. Enhancing your filtered air quality – economical but highly effective additive to your HVAC filter system that widens the spectrum of particles stopped by your filter fabric. Particularly effective against mold, bacteria and viruses.

## Loro Pipework Distributor

The LORO piping system includes LORO-X steel discharge pipes, LORO-XC stainless steel pipes and LORO-XD steel pressure pipes for all shipbuilding constructions.

## One shot mini sterilisation

A portable, self contained disinfecting 'Myst' canister that launches a cloud covering 40 cubic metres. Reduce your on-board risk of infections. Ideal for cabin change overs. As used in many of the worlds operating theatres. Easy to use.

## Marinevac Drain Watch Unit

Perfect for galley sinks  
Easy Installation. Battery or  
mains power supply.  
Enzyme based chemical also  
supplied.

## Filters – clean engines, produce pure efficient performance

Fuel and air are the essential ingredients for engine combustion. As the only filters approved by mtu for use in their engines, mtu filters are tested to provide high quality filtration. Every component is designed and engineered to meet mtu's legendary standards.

Established in 2005 Marinevac, based in Palma de Mallorca, has become one of the leading companies for grey and black water pipe descaling.

Working globally with the world's largest superyachts, services can be offered in Spain, France, Italy, Croatia, Montenegro, Florida, Malta, Sint Maarten, South East Asia and Australia.

Marinevac's mission is to provide our customers with an extremely high level of quality service working together with like minded local professionals to achieve a common goal...

'Your total satisfaction'.
