

Who We Are

Marinevac are Specialists in Marine Waste Water Management & Hygiene Solutions

Marinevac is a globally recognized leader in marine vessel hygiene and waste water management services. Established in 2005 and headquartered in Palma de Mallorca, Spain, we have built an exceptional reputation serving the world's most prestigious superyachts, as well as commercial vessels including ferries, container ships, and military vessels.

Our key services include:

Grey Water Sink, Shower and Drain Cleaning

Marine HVAC Cleaning and Maintenance

Black Water Pipe Descaling

DPFS Fabrication and Installation

Pipe Relining and Repair

With operations spanning across Abu Dhabi, Australia, Croatia, Cyprus, Dubai, France, Germany, Greece, Holland, Italy, Malta, Montenegro, and Spain,

Marinevac delivers professional marine hygiene solutions wherever your vessel operates.

Our History

Since our founding in 2005, Marinevac has pioneered innovative solutions in marine vessel hygiene.

We began offering specialized black water pipe de-scaling services in 2007, introducing a unique approach to maintaining waste water vacuum systems on board superyachts. This groundbreaking service quickly established our reputation for technical excellence and innovation in an underserved sector of the maritime industry.

Over the years, we have strategically expanded our expertise and service portfolio to meet the evolving needs of our clients. Our growth has taken us across Northern Europe—including Germany, Holland, and France—throughout the Mediterranean—with established operations in Spain, France, Italy, Malta, Greece, Croatia, Cyprus, and Montenegro—and into the Middle East, where we now serve clients in Abu Dhabi and Dubai, as well as expanding into Australia to support vessels in the Asia-Pacific region.

This expansion reflects our commitment to being wherever our clients need us, providing consistent, high-quality service regardless of location. We have become the trusted partner for vessel owners, captains, and management companies worldwide, supporting them through every stage of their vessel's maintenance and operational requirements.

Our commitment to excellence and continuous innovation has positioned us as industry leaders, working with the largest and most prestigious superyachts across the globe.

Our Services

Please click on any of the below for more information

Black Water Pipe Descaling since 2007

Marinevac offers global pipe descaling service operation, enabling your sewage system to be cleaned effectively under vacuum with minimum inconvenience.

Grey water - Sinks, showers and AC drains cleaning and treatment

Blocked, restricted or slow flowing grey water drains are a common problem on board which if left untreated can become a serious problem and even cause flooding

EVAC and Jets Pump Repair and Parts

Prevent unplanned downtime by ensuring you have access to timely repairs and spare parts through us.

Specialised services for all marine holding tanks

Tank Services - Shotblasting, welding, painting and coating for yachts available in Mainland Spain, France, Italy, Germany & Holland.

HVAC – Air Conditioning Cleaning

HVAC ducting requires regular cleaning to help comply with fire prevention requirements and to also provide a healthy living and working environment.

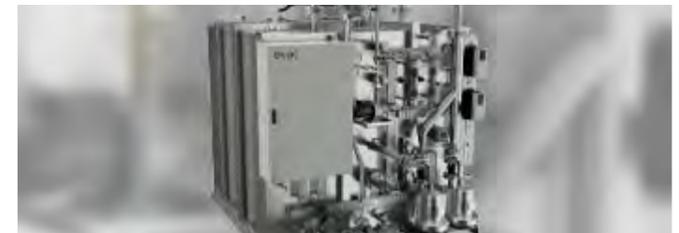

Raw Water Pipe De-Scaling, European Distributor For Rydlyme

Rydlyme is a biodegradable descaler that safely dissolves calcium, rust, zebra mussels and other mineral deposits, request information on our descaling service.

evac

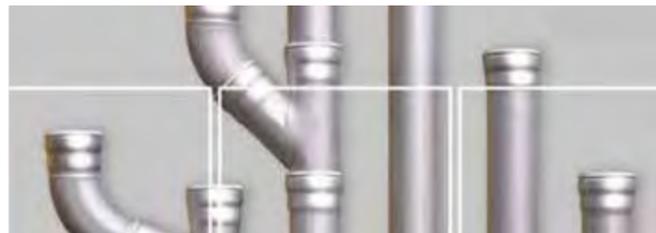

EVAC Spare Parts – Worldwide Delivery

As an EVAC certified partner, we can supply genuine spares for all EVAC systems and deliver them wherever you are.

Evac MBR Wastewater Treatment System

The Evac MBR (Membrane Bioreactor) wastewater treatment system, one of the most advanced marine wastewater solutions available today

Loro-X lightweight discharge pipe systems

Easy fit steel and stainless steel pipe system, fully approved for a wide range of nautical uses.

DPFS fabrication and installation for Superyachts

A Diesel Particulate Filter System removes up to 99% of soot and particulates from the exhaust – preventing damage to paintwork and the environment.

Pipe Relining and Repair

Using our pipe repair coating technology we renovate your pipe infrastructure by cleaning & coating the inside of existing pipe saving time and disruption.

Marine Growth Prevention Systems and Spare Parts

Easy to install, Marine Growth Prevention for Sea Water Pipework is designed to eliminate blockages in seawater cooling lines caused by barnacles and mussels.

Our services are available in:

Abu Dhabi | Australia | Croatia | Cyprus | Dubai | France | Germany | Greece | Holland | Italy | Malta | Montenegro | Spain

“

I wanted to write and thank you for the excellent service you provided us during our shipyard yard period in Barcelona.

We have had a trouble free vacuum toilet system since you descaled the system a few months ago and have completed this season without incident. I appreciate how conscious you were about not interrupting normal operations and the care you took in protecting the interior spaces.

M/Y Phoenix II
