

Operating worldwide

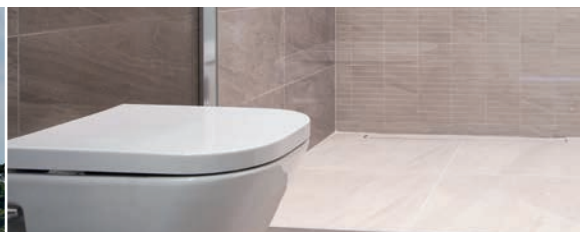

Marinevac, specialists in Superyacht black and grey water pipe de-scaling and waste water management.

Telephone: **+34 687 655 322** / info@marinevac.com

Our services

Marinevac offers vacuum, black & grey water pipe descaling, AC duct cleaning & air purification for large yachts and commercial vessels worldwide

Black water pipe descaling

We offer a global pipe descaling service, enabling your sewage system to be cleaned under vacuum with minimum inconvenience

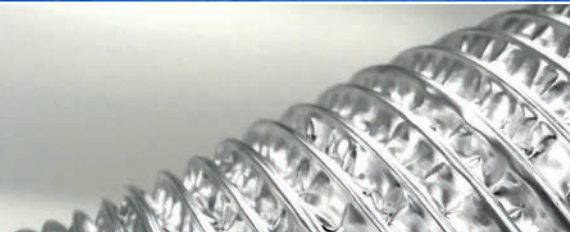

Grey water sink & drain cleaning

Blocked, restricted or slow flowing grey water drains are a common problem on board which if left untreated can become a serious problem

Pipe re-lining service

A non-invasive pipe inspection, repair, reconditioning and relining system for fresh, grey and black water, vent, and fire suppression pipework.

AC Duct cleaning services

HVAC ducting requires regular cleaning to help comply with fire prevention requirements and also provides a healthy living and working environment

DPFS superyacht exhaust treatment

Our Diesel Particulate Filter System removes up to 99% of soot and particulates from the exhaust – preventing damage to paintwork and the environment
