

Regular pump maintenance

Easy to overlook but an essential part of routine maintenance, the sewage vacuum pump is the heart of the vessel's sanitary systems and essential to life on board.

EVAC and JETS pump service and repair

Prevent unplanned downtime and potentially expensive emergency repairs by booking a regular servicing plan with us. We'll ensure you receive only genuine original manufacturer high-quality spare parts, and your pumps are serviced by experienced engineers. Contact us today.

Prevention better than cure

The vacuum pump is the heart of an EVAC or JETS toilet system so it is important to keep up with a regular preventative maintenance plan.

Minimising your pumps' downtime

For emergency repairs, our service centre is equipped to give you the fastest turnaround

time possible and our pick-up and drop-off service aims to ensure your pumps are only offline for a short, prearranged period.

EVAC and JETS recommend that pumps are regularly serviced to maintain reliability and high performance levels.
