

Don't risk costly illness on-board.

When it comes to the safe environment of your yacht, you cannot afford to risk the well-being of crew and guests. Ensure the very highest levels of protection with a total sterilisation solution from PuraMyst.

The process

Using specialised equipment our technicians move through your vessel and emit a dry mist that moves like a fog. It contains a safe biocide which eradicates 99.999% of all airborne and surface pathogens and viruses including MRSA, Norovirus, as well as modern viruses that can cause respiratory inflammation.

- **Effective surface and air decontamination and sterilisation**
- **Micro-particle technology is dry on contact**
- **Effective against spores, moulds and bacteria**
- **Effective against MRSA, Norovirus, Flu and respiratory viruses**
- **High Kill rate (99.999%)**
- **Ultimate defence on-board against bacteria and viruses**

Preventative or combative

Our specialist professionals are always ready to tackle preventative approaches or emergencies of any scale.

Based in Palma, Mallorca we can reach you wherever you are berthed and Myst your vessel within hours, leaving your environment sterilised and safe for guests and crew alike.

surface and air sterilisation

*Preventing
disruption
at sea*

Sterilise your living space and make it safe

For maximum sterilisation

Without doubt the most efficient and effective way to help prevent or treat a modern virus is to spray the entire boat with the PuraMyst sterilising cloud.

The unique particle technology used ensures even the areas and surfaces hidden from sight or difficult to access are also treated. Including your entire HVAC system.

How it works

Ideally the ship will be 'human-free'. Then our skilled misting team spray the entire area (or selected areas) with a specialised biocide which is perfectly acceptable for humans but is deadly for airborne and surface pathogens and bacteria.

PuraMyst eradicates 99.999% of all airborne, diseases, surface pathogens and viruses including MRSA, Legionnaires, Salmonella and Norovirus, as well as modern viruses including those causing flu-like and respiratory symptoms.

PuraMyst completely sterilises walls, floors and surfaces to remove hidden threats and leaves no visible trace or residue.

Spanish Ministry of Health Register number : 17-20/04-05660

Safe to use on furnishings

There's no need to cover any surfaces or soft furnishings. PuraMyst is safe on to use on any surface including fabrics.

PuraMyst. The visual fog that sterilises the air and everything it touches...

Our service is professional, efficient and discreet and the PuraMyst technicians can usually 'Myst' an entire boat in just a few hours.

PuraMyst can be applied on a preventative or combative approach.

Sterilising your vessel can help towards your COSWP obligations.
